

Springfield FAASTeam presents:

# **Springfield Flying 20 Club 50th Anniversary Event and FAA WINGS Seminar**

Are you ready to move up to high performance and/or complex airplanes? This milestone is one not unlike the first solo; it is one that every pilot remembers for life. High performance and complex airplanes offer excitement, performance and cross-country practicality not available in lesser machines. It is a step, however, that must be taken with proper training and skill development. Come and learn as these experienced flight instructors lay out the path to success in learning and utilizing high-performance general aviation aircraft. Here you will learn: Why not all complex aircraft are high performance, and vice versa. What is required to qualify as Pilot-in-Command of these advanced machines. What to expect in training for your high-performance and/or complex endorsements. What you will find different--starting from the first takeoff--when you first pilot a high-performance aircraft. The enhanced value of checklist discipline when piloting these aircraft. Human factors associated with high-performance aircraft. Common errors in flight planning and execution for pilots new to faster, more powerful machine. And, why they are so much more fun!

**Event Details** In celebration of the 50th year of the Springfield Flying 20 Flying Club, an anniversary event is being held from from 9:00

## Event Details

**Sat, Sep 20, 2014 - 10:00 CST**
